

Dear Hiring Manager,

I am writing to express my strong interest in joining your organization for a role that aligns with my skills in Cloud Computing and DevOps. I have recently completed my third semester of Master of Computer Applications with a specialization in Cloud Computing and DevOps, and I am eager to apply the knowledge I have gained in real-world environments.

During my academic journey, I have built a strong foundation in cloud platforms, containerization, CI/CD pipelines, and automation tools. I have worked on hands-on projects that include deploying applications using Docker, implementing continuous integration and delivery workflows, and leveraging cloud services to enhance scalability and performance.

These experiences have enhanced my technical capabilities and strengthened my problem-solving, teamwork, and learning mindset.

What excites me the most is the opportunity to work in a professional environment where I can continue learning, contribute to meaningful projects, and grow alongside industry experts. I am a fast learner, highly motivated, and always committed to delivering quality work. I believe that my enthusiasm for technology combined with my technical background makes me a suitable fit for an entry-level role in Cloud or DevOps engineering.

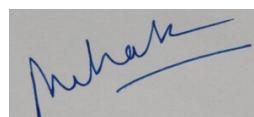

I would welcome the opportunity to discuss how my passion and skills align with your organization's goals. Thank you for considering my application. I look forward to the possibility of contributing to your team and growing my career under your guidance.

Sincerely,

Mehak
